

2019 JOB OPPORTUNITIES

LANDSCAPE DESIGN
CONSTRUCTION
IRRIGATION
GARDEN CENTER
MAINTENANCE

Gardenwerks is a unique place. It is staffed almost entirely with college graduates doing manual labor. Not out of necessity but by choice. We are intelligent and hard working people who have chosen a life shaping the earth with soil and plants, wood and stone to make a more beautiful community. We have become friends. We enjoy the challenges of our professions; the day to day problem solving, the interaction with clients, the secret knowledge of plants and the truth in physical labor. We have gone on to be doctors, lawyers, musicians, engineers, teachers, nurses and much more. Though, many of us have stayed in the truth. We are a dying breed and are always looking for another intelligent (no degree required) hard-working individual to join us. You don't need to know the latin name for our state flower or how to build a boulder wall or run an excavator. You do need a love of the outdoors, hard work and good people.

Garden Maintenance

Looking for an enthusiastic, fit, hardworking gardener to join our team. Our maintenance division provides environmentally friendly services including: pruning, maintaining and developing existing gardens, annual flower containers, weeding, organic fertilization, and integrated pest management. This position requires an eye for detail, excellent communication skills and a willingness to learn.

Irrigation Foreman & Technician

Seeking a hardworking, mechanically inclined individual interested in joining our irrigation team. Our goal is to give customers the most efficient and effective irrigation system, built with quality components. Our irrigation projects range from sports fields to flower pots, all built with integrity and water-conserving elements. Services include: spring startup and adjustment, winterization, installation of new systems, repairs and additions to existing systems, and irrigation system audits.

Landscape Crew

This position is a great learning experience, encompassing all aspects of a landscape installation. The ideal candidate enjoys outdoor physical work and collaborates well with others. Additional positions are available for those with previous landscape experience.

Nursery & Garden Center

Our unique nursery is proud to offer our community a full line of plants tried and true to the area, eco-friendly gardening products and quality bulk materials. Looking for a reliable, hardworking person to provide customer service, plant care and campus maintenance.

Internship

Those interested in the green industry are encouraged to apply for our internship program, offering hands-on experience to supplement your education and help determine your future career. Our flexible program can be tailored based on interest and experience.

Please submit your resume to info@gardenwerks.com
